

PLY-BEAD®

PANELS

Real Wood Style Because It's Real Wood

Classic, Affordable Look

Ply-Bead® plywood panels from Georgia-Pacific provide the rich, traditional look of expensive bead-board planking at a fraction of the cost and labor. The classic beaded wood panels are perfect for walls, ceilings and wainscoting applications.

Durable, Practical, Versatile

Because they're real wood, Ply-Bead panels resist dents, gouges, scuffs and scratches. The durability of Ply-Bead panels makes them ideal for high traffic areas like bonus rooms, finished basements, playrooms, exercise rooms, bathrooms, and laundry rooms. They're also great for exterior weather-protected areas like garages, porch ceilings and soffits.

Installation with ease

Ply-Bead panels are lightweight and easy to install.* The 4' x 8' Southern Pine plywood panels are pre-sanded and ready to paint. And their shiplapped edges virtually hide the seams once installed.

* Installation instructions are available at www.builditbetter.com.
