International Shipping

To prevent the introduction and spread of plant pests, **ISPM 15: International Standards for Phytosanitary Measures**, requires that internationally shipped solid wood pallets be debarked, treated with heat or fumigated with methyl bromide, and marked with a seal of compliance.

Pallets made with engineered wood, including DryGuard® Enhanced OSB, are exempt from ISPM 15 regulations. This is because the process of manufacturing engineered wood destroys any live organisms in the wood. (Source: "Boxes, Crate and Reel Manufacturing", **www.PerformancePanels.com**).

Formaldehyde Emissions

BlueRibbon® Rated Sheathing contains no added urea formaldehyde resins. PS 1 and PS 2 structural panels are exempt from testing by the California Air Resources Board (CARB) in the **Composite Wood Air Toxic Control Measure (ATCM)** and phenolic bonded structural panels are exempt from testing or monitoring by HUD in the **Manufactured Home Construction and Safety Standards**.
