

THE SYSTEM THAT SIMPLIFIES CONSTRUCTION

See how ForceField® Weather Barrier System, the integrated WRB from Georgia-Pacific, helps you achieve a continuous building envelope that's easy to install and gets your homes dried-in faster.

Eliminate the steps of applying house wrap or roof underlayment

Can be applied by one installer in one trip around the building

No tearing, blowing off or retouching

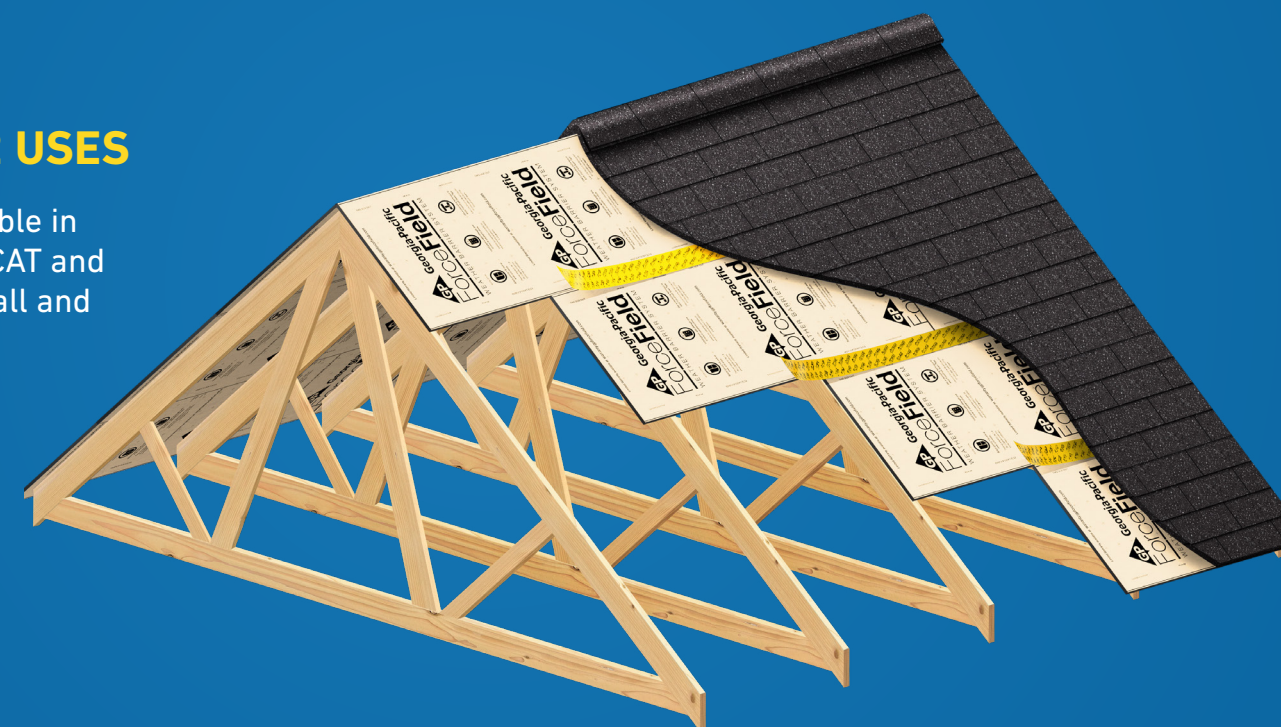

FORCEFIELD® PANELS

Integrated WRB sheathing panels install easily like standard oriented strand board (OSB) on walls and sloped roofs. They are available in three lengths to help installation move quickly.

- 1 Premium OSB
- 2 Moisture-resistant resins
- 3 Enhanced overlay

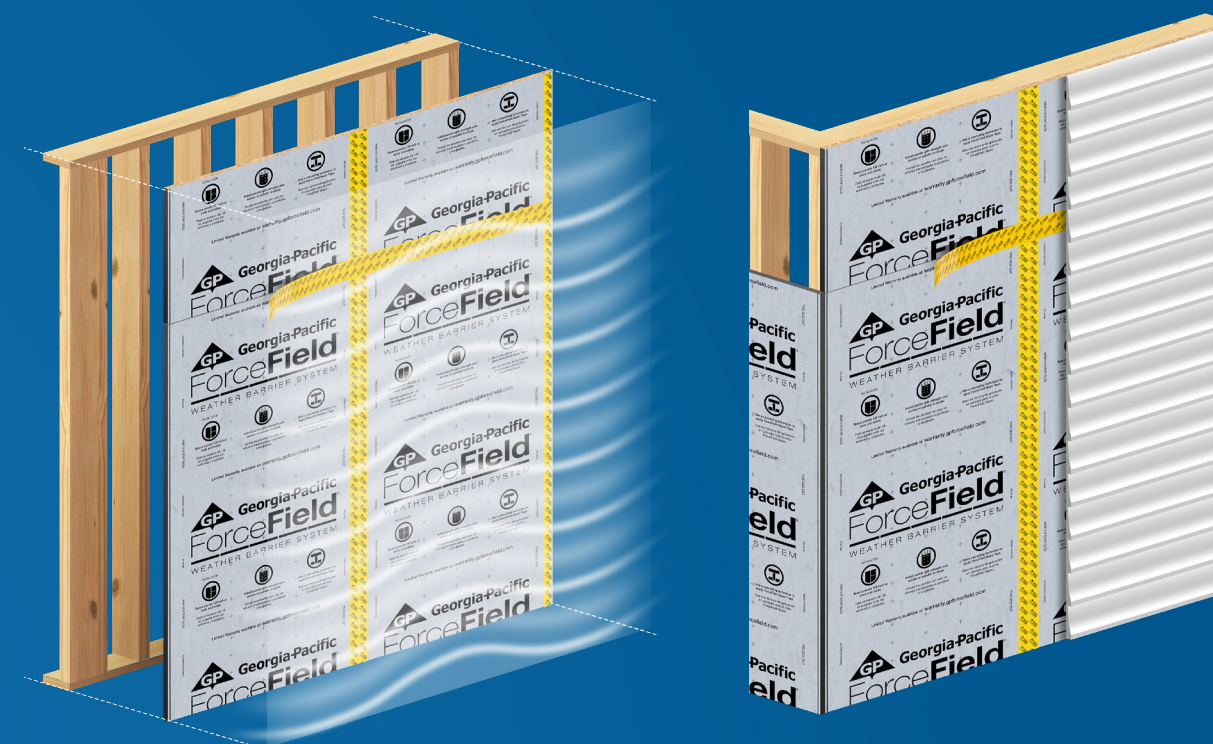

1 SYSTEM, 2 USES

Panels are available in 7/16 CAT, 15/32 CAT and 19/32 for both wall and roof applications.

HELP PROTECT YOUR HOMES FROM THE ELEMENTS

- Panels reduce water intrusion
- Accessories minimize air leakage
- Compatible with many cladding types

FORCEFIELD® PREMIUM TAPE

- High-performance, self-adhered flashing tape
- Can be used to treat joints and seams on walls and roofs
- Durable and tear-resistant once applied
- Conformability for bonding around curves and corners

CUSTOMIZE ACCESSORIES FOR DETAILING

Make installation even smoother with a wide range of accessories that help with tricky detailing. Panels help achieve a barrier against moisture, and once seams, rough openings and transitions are treated, the system helps achieve an air barrier as well.

1 FORCEFIELD® FLEX TAPE

- Stretchable, self-adhered flashing tape
- Ideal for protecting door and window rough openings on walls, as well as penetrations and transitions

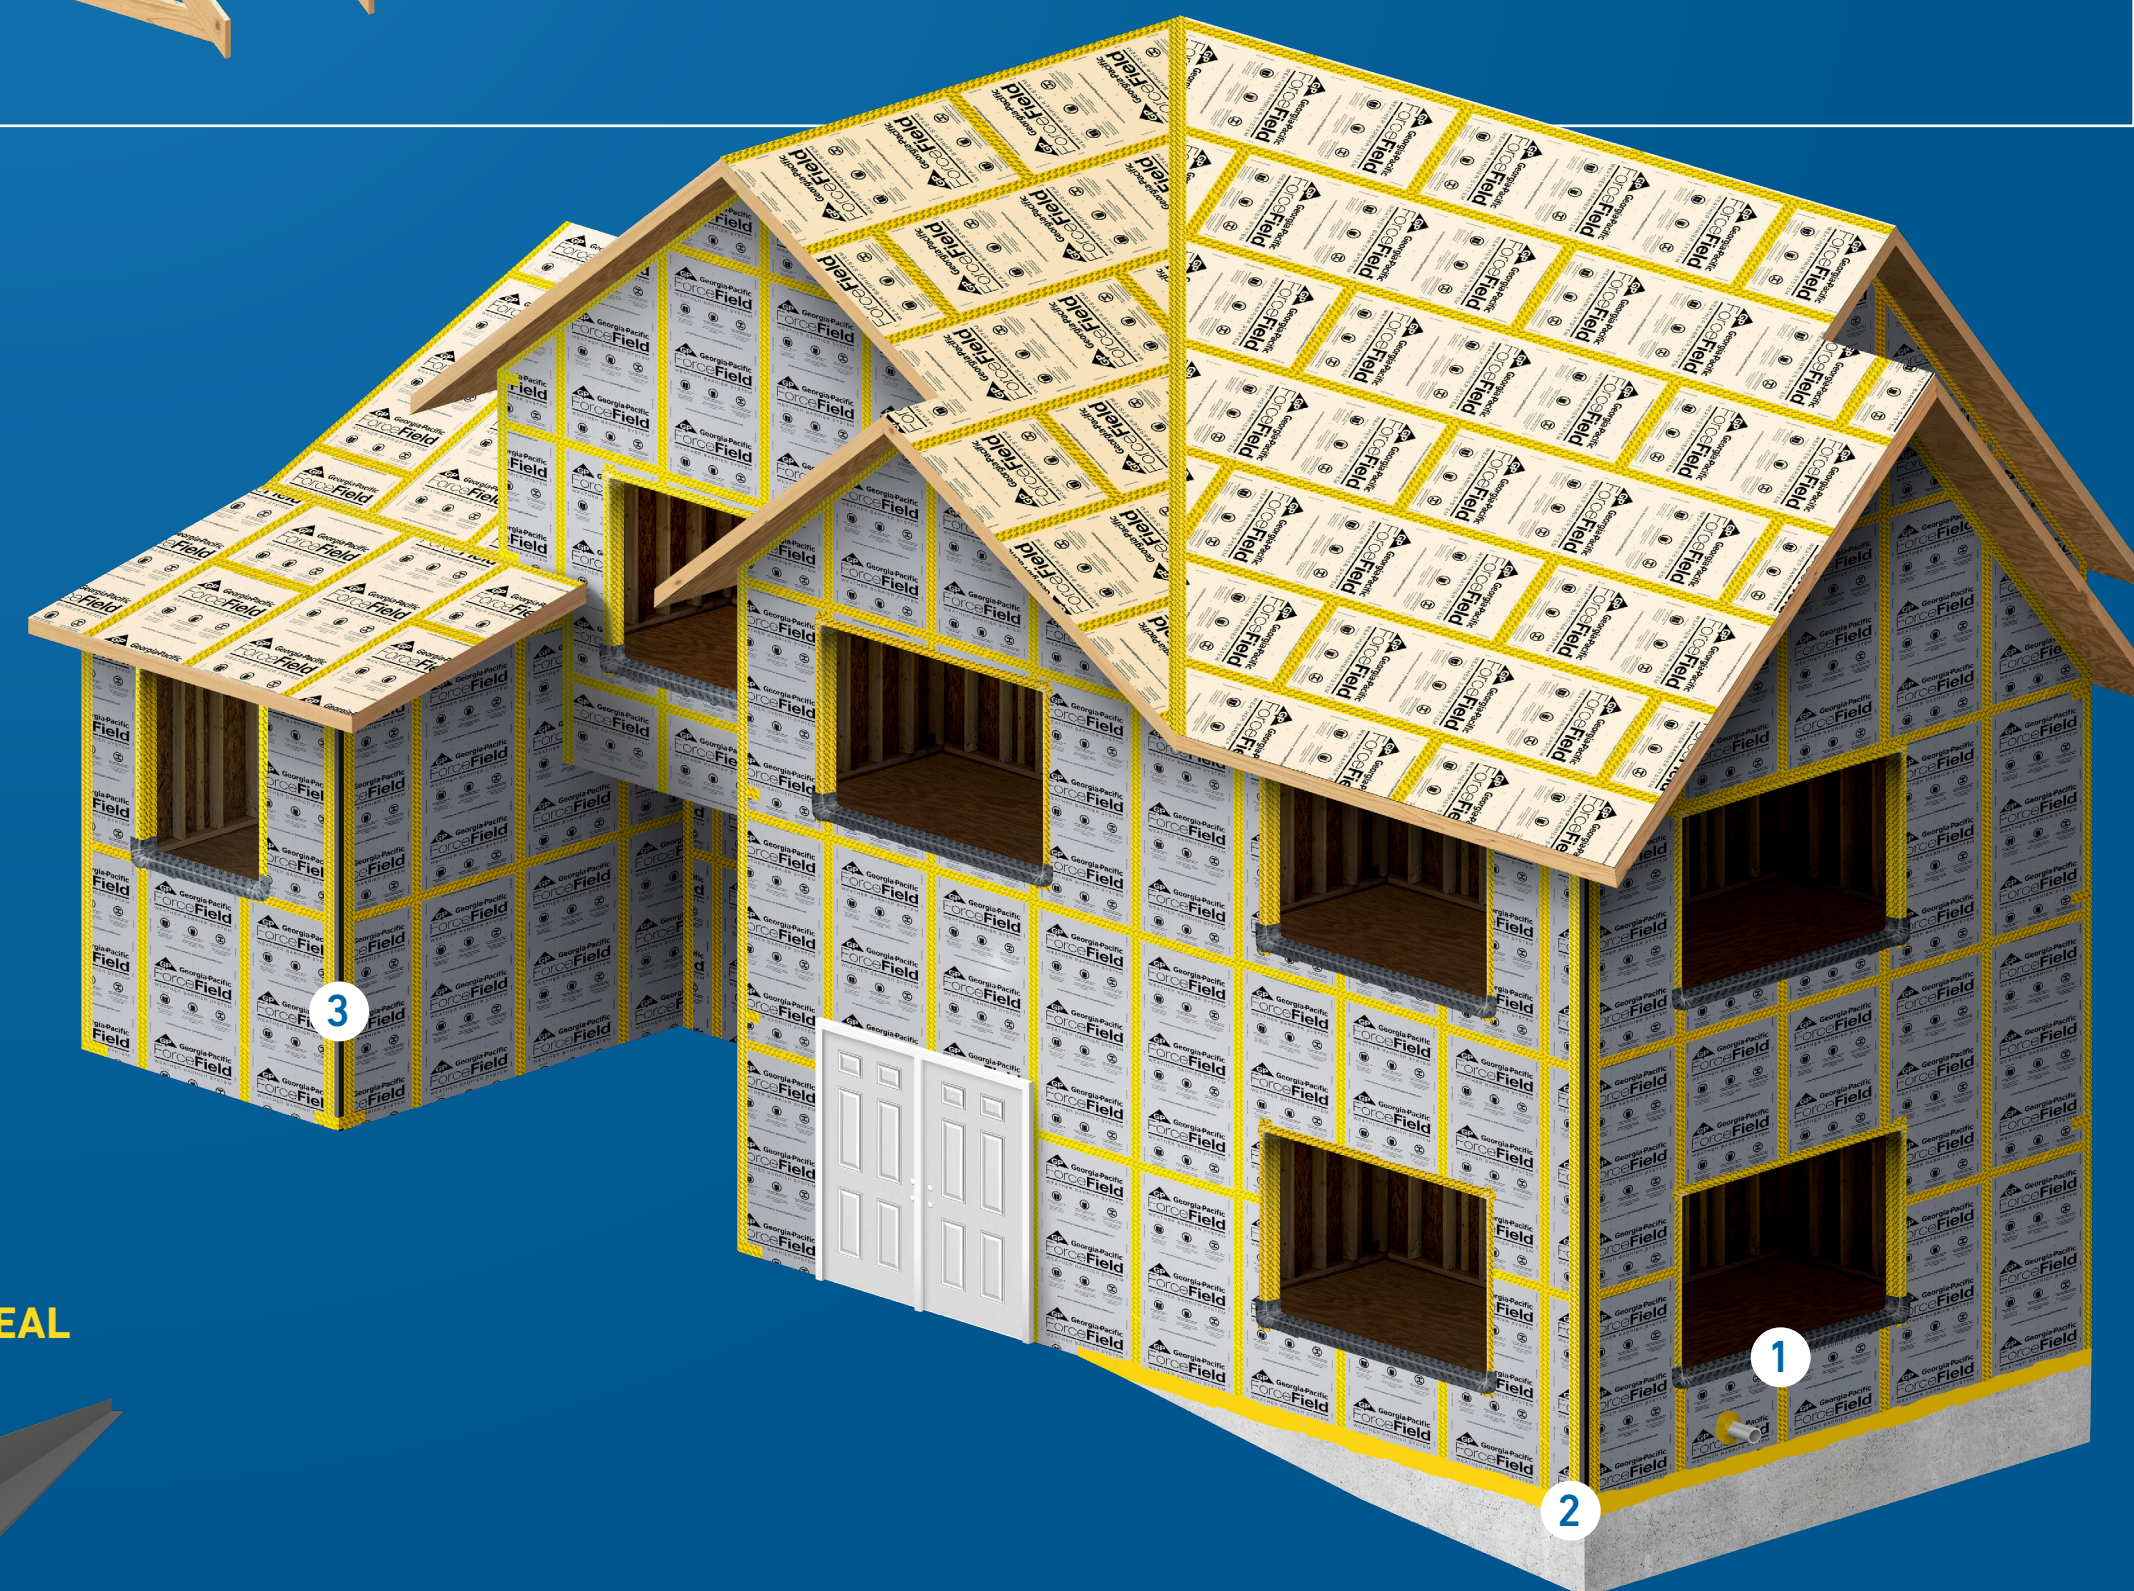

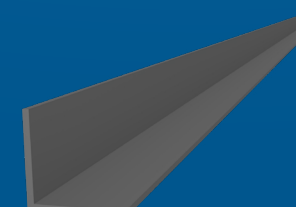

2 DENSDEFY® LIQUID FLASHING

- A premium option for sealing penetrations and material transitions
- Treat transitions from one material to another

3 FORCEFIELD® CORNER SEAL

- Simplifies the detailing of inside and outside exterior wall corners
- Creates a "living hinge"
