Build More Fire Resistance Into Your Walls

Without changing the cost or your construction process.

**ToughRock® Fireguard 45® Gypsum Board** from Georgia-Pacific is a 1/2” interior wallboard manufactured with enhanced fire-resistant properties compared to 1/2” standard drywall or 1/2” lightweight drywall products.

**It’s needed because** 80% of homeowners are concerned about a fire in their home causing personal injury or property damage1, but few homes are built with fire-rated wall assemblies to help address those worries.

**It works because** 1/2” ToughRock® Fireguard 45® Gypsum Board is the only standard 1/2” gypsum board classified by UL for use in 45-minute fire-rated wall assemblies. When applied to walls framed with 2” x 4” wood studs spaced 16” OC2, every interior wall in the home can be a 45-minute fire-rated wall assembly without requiring the added cost of thicker, heavier fire-rated drywall.

SIZES:
- **Thickness:** 1/2” (12.7 mm)
- **Width:** 4’ (1220 mm), 54” (1372 mm)
- **Length:** 8’ (2440 mm) to 16’ (4880 mm)

APPLICATION EFFICIENCY/VERSATILITY:
- Lighter and less expensive than both 5/8” Type X and 1/2” Type C fire-rated wallboard.
- Suitable for ANY wall or ceiling using 1/2” standard or lightweight drywall at no additional purchase cost.
- Usable as a 1/2” gypsum ceiling board to increase sag resistance with frame spacing up to 24” OC.

1 Represents approximate weight for design and shipping purposes. Actual weight may vary depending on manufacturing location and other factors.
2 Per Gypsum Association document GA-235.
3 Specified minimum values are as defined in ASTM C1396.
4 Products qualify for NFPA Class A or BC Class 1.

Third Party Testing:

FIRE-RESISTANCE - Wall assemblies built with 1/2" ToughRock® Fireguard 45® gypsum board outlasted assemblies built with 1/2" lightweight wallboard5.

SOUND-TRANSMISSION - Wall assemblies built with 1/2" ToughRock® Fireguard 45® gypsum board outperformed assemblies built with 1/2" lightweight wallboard in lowering the transmission of sounds between adjoining spaces6.

5 Source: WFCI Report#14083
6 Source: RAL™ Sound Transmission loss test; Assemblies tested with 24" wood/steel stud walls

Third Party Certification:

Georgia-Pacific ToughRock® Gypsum Board products are GREENGUARD and GREENGUARD Gold Certified for low emissions of volatile organic compounds (VOCs). They are listed in CHPS® High Performance Product Database for low emitting products.

FIRE SAFETY CAUTION: Passing a fire test in a controlled laboratory setting and/or certifying or labeling a product as having a one-hour, two-hour, or any other fire resistance or protection rating and, therefore, as acceptable for use in certain fire rated assemblies/systems, does not mean that either a particular assembly/system incorporating the product, or any given piece of the product itself, will necessarily provide one-hour fire resistance, two-hour fire resistance, or any other specified fire resistance or protection in an actual fire. In the event of an actual fire, you should immediately take any and all actions necessary for your safety and the safety of others without regard for any fire rating of any product or assembly/system. For additional fire safety information, visit www.buildgp.com/safetyinfo.
